POLICY

1 Where circumstances or events of sufficient gravity occur and adversely impact on a postgraduate researcher’s progress consideration will be given by the University to granting a period of suspension or extension of study (see the definitions given below) to mitigate against the difficulties encountered and to ensure the PGR is not disadvantaged.

GUIDANCE

2 The University understands that some postgraduate researchers (PGRs) will encounter events or circumstances which disrupt their academic progress (eg ill-health, personal difficulties). In many cases PGRs will recover any time that is lost during their
candidature but where difficulties are sufficiently disruptive this may not be possible. The University mitigates against the difficulties encountered, to ensure the PGR is not disadvantaged, by considering a period of suspension or extension of study which will lengthen the overall candidature and delay the deadline for submission of the thesis for examination. In the case of suspensions of study the date for transfer to a specific research degree category may also be delayed.

The time limits for each research degree programme are outlined in the University regulations and individual programme of study specification.

Award of a research degree

3  In all cases the PGR must meet the criteria for award of the research degree. For research degrees there can be no “mitigating circumstances” with criteria for the award. All PGRs must complete an oral examination and the thesis submitted for examination has to reach the required standard for the award of the degree and the specified learning outcomes must be met. Any mitigating circumstances which may have affected the candidate during their period of study should not be taken into account as part of the assessment of the thesis and should never lead the examiners to award a research degree where the work is not felt to be of the appropriate standard\(^1\).

Transfer to doctoral study

4  In order to recommend a PGR for transfer the panel must be satisfied that the PGR and their research project have the potential for success at doctoral level and also whether completion of a thesis within the standard period of study for the programme concerned is a reasonable expectation.

The same academic standards for transfer to a specific research degree must be upheld and mitigating circumstances which may have affected the PGR during their period of study should never lead the panel to recommend transfer where the potential for success has not been demonstrated.

Such factors might, however, be taken into account when determining what support the PGR may need going forward, including whether any suspension or extension of studies should be considered.

5  When considering requests for suspensions and extensions of study the University will take due regard of University of Leeds regulations and external factors including the Equality Act 2010, Home Office and Research Council requirements. These arrangements are covered by the University's Equality and Inclusion Policy.

A  Procedure

Postgraduate Researchers

6  If a PGR is unable to study or their progress is significantly disrupted they should let their School know as soon as possible. They can do this by contacting their supervisor or Postgraduate Research Tutor. Alternatively they may discuss their circumstances with a member of the staff in the Graduate School Office. Failure to take prompt action may lead to the PGR losing the time available to complete their studies.

---

\(^1\) A framework for the consideration of reasonable adjustment for PGR assessment points can be found on the SES website.
PGR’s can request a suspension/extension of study in the following ways:

- by completing the University’s suspension/extension request form before returning the completed form to their Faculty Graduate School Office/PGR Administrator for consideration. This form is available on the Student Education Service website.
- by submitting their request via the suspension/extension of study workflow in GRAD. This can be accessed in GRAD via the change request menu. If the grounds for the suspension/extension of study request is confidential, the PGR is advised to discuss their circumstances with the Faculty Graduate School/PGR Administrator before completing the request in GRAD. Further information about the use of GRAD for suspensions/extensions is set out in Annex A.

Some Faculties/Schools may have their own local level arrangements by which PGRs are able to submit requests for extensions/suspensions of study. The Faculty Graduate School Office/PGR Administrator are able to provide guidance on local processes.

Supervisors

Supervisors are responsible for alerting the Postgraduate Research Tutor, to:

- any situation where it may become necessary to request a suspension or extension of study for a PGR, in a timely manner;
- reporting that there has been no contact or missed supervision meetings with individual PGR for a month (unless absence has been authorised for illness or other suspension etc) or where there is a pattern of absences which is affecting the PGR’s progress or causing concern for the PGR’s well-being in accordance with the University’s Attendance Monitoring Policy (see under “Progress and Monitoring”).

Postgraduate Research Tutors

Requests for suspensions and extensions of study for individual PGRs should be considered by the Faculty/School’s Postgraduate Research Tutor. If the Postgraduate Research Tutor is supportive of the request they should send a recommendation for consideration by the Programmes of Study and Audit Group. The recommendation can be made by either:

(a) Completing the appropriate pro forma available on the SES website and returning it to Postgraduate Research and Operations (PGRO) (via email to Progress.temp@adm.leeds.ac.uk).

The recommendation must be authorised by the PGR Tutor (or Faculty Director of PGR Studies). Authorisation may take the form of signature on the pro forma (written or digital) or an email from the PGRT (or Faculty Director of PGR Studies) confirming he/she has authorised the recommendation. In the absence of the PGR Tutor the Head of School may consider and authorise recommendations. PGRO will then arrange for action to be taken to consider the recommendation.

OR

(b) Via the recommendation for a suspension/extension of study workflow in GRAD (which is part of the charge requests menu). Further information about the use of GRAD for suspensions/extensions is set out in Annex A.
10 Where there is a disagreement on the outcome of a request for a suspension or extension of study at School level (for example between the PGR/supervisor and the PGR Tutor) the case should be forwarded to the Director of PGR Studies for adjudication before any recommendation is made to the Programmes of Study and Audit Group.

Programmes of Study and Audit Group

11 Responsibility for considering, and reaching decisions on, requests for suspensions and extensions of study is delegated by the Graduate Board to its Programmes of Study and Audit Group (PSAG). In practice, to ensure decisions are taken without unnecessary delay, action is normally taken on behalf of the Group by its Chair on a weekly basis. When the Chair is unavailable or the recommendation arises from a School within their Faculty the request will be considered by an alternative member of PSAG. In particularly complex cases the Chair (or alternate) may refer the recommendation for consideration to a sub-Group of PSAG. In such cases the PGR Tutor and/or supervisor may be invited to attend a meeting of the sub-group to discuss the candidature.

Postgraduate Research and Operations

12 When a request is approved PGRO will issue a letter to the PGR confirming the details. The letter will be sent to the PGR c/o their student email account. A copy of the letter will be scanned and sent to the Faculty/School PGR Administrator. This individual is responsible for ensuring all relevant Faculty/School staff are made aware of the decision including the supervisor(s). The BANNER record will be updated to show the suspension/extension and revised maximum time limit (SWARDAT). The suspension/extension information and revised maximum time limit will be displayed in the Graduate Record of Achievement and Development (GRAD).

B Suspension of Study

13 A “suspension of study” is a period of interrupted study (of more than one month) when the PGR temporarily leaves the programme of study and loses their registration status. During this period the PGR is not entitled to receive supervision and will not have access to the library. Access to IT facilities will remain available to the PGR – this includes email, VLE and portal access. During this period a PGR is not liable for academic fees and is not expected to progress their research. The period of suspended study does not count towards the time available for completion of the degree and the “clock” towards the deadline for submission of the thesis/deadline for transfer will stop ticking whilst the suspension is in place.

The University is required to withdraw immigration sponsorship for Tier 4 student visa holders during the period of suspension (see section J below).

Examples include: serious illness (normally supporting medical evidence (eg doctor’s note) is required, significant personal difficulties, bereavement, financial reasons, accident, maternity (for maternity see also the University’s policy on support for pregnant students and students with very young children ).

---

2 Consideration must also be given to the terms and conditions of any studentship held by the PGR
3 In exceptional circumstances only a School may request PGRO to ask the library to maintain access (enquiries to rp_student@adm.leeds.ac.uk)
The PGR is expected to return to study immediately after the period of suspension has ended unless an additional period of suspension has been requested. In all cases the Postgraduate Research Tutor should be satisfied that the PGR is able to resume study and the difficulties have been overcome. Where appropriate documentary evidence should be sought. For example when a PGR resumes study following a period of suspension due to ill-health it will be on the basis that he/she is medically fit to do so and satisfactory medical evidence should be provided by the PGR (e.g. through the provision of a fit to return to study note). In more routine cases expiration of the sickness note will be sufficient.

Suspensions will not normally be backdated for more than one month. A request for a retrospective suspension of study will only be considered in the most exceptional circumstances. It is, therefore, essential that prompt action is taken by the PGR, supervisor and PGR Tutor to formalise requests for suspensions of study.

**Failure to return from a period of suspension**

PGRs are expected to return to their studies at the end of the period of suspension and to re-register within 4 weeks of their return. If they are unable to restart their studies and require a further suspension they should let their School know immediately. Failure to keep in contact with their School, when the period of suspension has ended, may lead to their losing the time available to complete their thesis/submit for transfer or be presumed to have withdrawn from the University.

**Extension of Study**

An “Extension of study” is a lengthening of the candidature to take account of a period of unexpected/unavoidable disruption to studies which has slowed down academic progress significantly. The PGR will not leave the programme of study and will continue to progress their research/thesis writing but with some disruption of study over a limited period slowing progress rather than interrupting progress completely.

Examples include: equipment breakdown, serious illness or recovery from accident/surgery, significant personal difficulties or family illness which have substantially affected progress.

During periods of extension PGRs will have access to Library and IT facilities and will be entitled to supervision. They will not normally be entitled to laboratory or other resources provided by the School. All research work, including experiments, should have been completed within the standard period of study and any period of extension granted should be for writing up the thesis.

Extension requests will normally only be considered after the completion of the standard period of study and at a point when it is clear how much of the time lost has been compensated for during the standard period of study.

Cases will be expected to show that some unforeseen and unforeseeable circumstances have arisen which have significantly and adversely affected the progress of the research and against which precautions could not reasonably have been taken.

Research projects require careful time management. Delays to the delivery of equipment and/or equipment breakdown are not uncommon. During periods of such inconvenience consideration should be given to the other aspects of the research the

---

4 Consideration must also be given to the terms and conditions of any studentship held by the PGR
PGR can progress to avoid impact on the length of the overall candidature. In such cases waiting until the end of the standard period of study to assess the impact of delays is appropriate.

21 Where an unexpected event/disruption to study occurs during the overtime period the extension request should be made at the point the event occurs. The PGR and the supervisor(s) should agree a timetable/work plan for completing the thesis which includes milestones. In some case the Chair of PSAG may require sight of the timetable for completion before considering an extension request.

22 Masterships by Research

In the case of Masterships by Research the maximum period of extension permitted on academic grounds is 3 months.

23 Integrated PhD and Master

In the case of Integrated PhD and Masters candidates, during the taught components of the degree, a case for mitigating circumstances may need to be submitted alongside a suspension / extension request. Information regarding the mitigation process can be found on the student services website.

D Extensions and long-term medical conditions and disability

24 The University acknowledges the practical difficulties related to individual circumstances resulting from long-term medical conditions and disability. Communication of difficulties encountered by PGRs at an early stage is encouraged as this will facilitate early intervention to address any difficulties and for appropriate support to be identified. Consideration will, therefore, be given, to requests for extensions based on long-term medical conditions and disability at the time the difficulty occurs or at the end of the calendar year of study (as part of the annual progress review process) rather than waiting until the end of the standard period of study as described above. PGRs should be encouraged to seek advice and/or support from the Disabled Student Assessment and Support (DSAS) Team or the Student Mental Health Team where difficulties occur. The Teams can offer specific support to assist PGRs to reach their full potential whilst at Leeds. Where a needs assessment/practitioner’s view is that a reasonable adjustment is to provide an extension to the candidature consideration can then be given to the length of time required. Faculties/Schools are encouraged, where appropriate, to liaise with the PGR and the DSAS/Student Mental Health teams before submitting requests for such extensions.

E Postgraduate Student Exchange (Study Abroad)

25 Any time spent by a PGR at a host institution will be included within the standard period of study. No period of suspension or extension of study will be considered as the expectation is that supervision and the research project will continue during this period.

F Limits to the Length of Suspensions/Extensions of Study

26 (Research Council award holders and those sponsored by external funding should also refer to the section M below)

27 Bearing in mind that Faculty/School structures change with time, supervisors leave for various reasons, and a topic, once original may not remain so indefinitely requests for indefinite suspensions of study will not be granted. The norm at present is for a period
of up to 12 month suspension to be considered by the University at any one time, with a review at the end of that period if necessary. The minimum period of suspension is one calendar month.

28 No PGR, commencing study from session 01 August 2012, will normally be granted periods of extension and suspension totalling more than two calendar years for a full-time student or three calendar years for a part-time student by the University. In the event of a PGR wishing to exceed this period, unless exceptional permission from PSAG is granted (see below), they will be required to withdraw from the research degree candidature, but may be permitted to apply to commence a new candidature.

Exceptional Permission for suspensions/extensions in excess of the total length normally permitted

29 Requests for exceptional permission for suspensions and extensions of study in excess of the total length permitted under the University’s regulations will be considered by at least two members acting on behalf of PSAG (normally the Chair and one other member, neither of which will be from the same Faculty as the PGR).

30 When considering such exceptional requests the Group will take the following into account:

- the individual mitigating circumstances
- the academic progress made to date
- the currency of the research
- the availability of continued supervisory support and any resources required to complete the work within the School
- a comprehensive timeline to completion which includes milestones/formal structure for monitoring progress agreed between the PGR and supervisor

31 In all cases the Group must be satisfied that there is a reasonable prospect of submission of a thesis of the appropriate standard for examination if the additional period of suspension/extension requested is to be granted.

G Documentary Evidence

32 The Programmes of Study and Audit Group wishes to ensure that decisions made about suspensions/extensions of study are well founded and therefore PGRs are required to provide third party documentary evidence to support requests (where appropriate). Evidence in a language other than English should be translated and certified. This evidence should be retained by the Faculty/School and not forwarded to PGRO. PGRO will check that the Faculty/School holds supporting documentary evidence (where appropriate) and may, in some cases, request sight of the documentary evidence.

33 Where illness is proposed as the grounds for suspension or extension of study the PGR must provide the school with satisfactory medical evidence (eg full medical certificate) as evidence in support of the request. The medical certificate might take the form of a fit to study note, letter or report from a medical professional (eg GP or doctor).
Guidance on what constitutes satisfactory medical evidence

34 The evidence should help the Faculty/School to understand how the PGR’s medical situation is affecting their ability to study and contain objective medical evidence (not just “the patient told me that …”). In the case of a suspension it should cover the period for which the suspension is required.

35 Faculties/Schools should advise PGRs to obtain information which includes:

(i) The dates and duration of any period when the PGR’s health has completely prevented or will completely prevent them from studying/when they are not fit to study;

(ii) The dates and duration of any period when the PGR “may be fit for study” if their doctor thinks that returning to study will help them recover. The doctor should be asked to advise on how the PGR’s health may affect their ability to study (for example unable to use a keyboard for long periods or decreased mobility so difficult to get onto campus);

(iii) For international PGRs studying in the UK on a Tier 4 student visa only confirmation of whether the student is fit to fly.

36 The presentation of a prescription or the box cover of medication or the submission of a series of medical appointments is not acceptable evidence as this gives no professional opinion of the PGR’s capacity to study.

37 Care should be taken by the Faculty/School to ensure that any suspension or extension request on the basis of illness reflects the severity and duration of the illness as described in the medical evidence.

38 In all cases it is the responsibility of the PGR to ensure that the evidence provided addresses these requirements.

39 PGRs who have taken suspensions of study on medical grounds will be required to provide their parent Faculty/School with evidence that they are medically fit to resume study at the end of the period of suspension (eg doctor’s note).

Grounds for Suspensions/Extensions of Study

40 Approval of requests for suspensions/extensions of study is not guaranteed. Poor academic progress is not reasonable grounds for a suspension/extension.

41 Cases where the PSAG is likely to be sympathetic to an application for suspension/extension include (provided that the length of time requested is reasonable in the sense that it bears close relation to the events experienced by the PGR):

- Accidents
- Bereavement
- Serious ill health (of the PGR) (accompanied by medical evidence (eg doctor’s note).
- Family illness
- Unexpected events e.g. theft, (accompanied by a police report), equipment not being delivered or equipment breakdown.
- Maternity (the PGR must make a request before the maternity leave is due to begin)
• Significant personal difficulties
• Systemic catastrophe in home country (eg war, natural disaster)
• Unexpected serious financial hardship
• Placements (where the request falls within the standard period of study, is no longer than 3 months in duration and is supported by the supervisor)

42 Cases where the PSAG is unlikely to be sympathetic to a request for suspension/extension include:
- When the PGR has completed the standard period of study on a full-time basis and is now in the overtime period and is now in employment and is making a request on the basis of “pressures of work”
- Where the request is based on the grounds that the PGR has got married/honeymoon period. The Group is of the view that this should normally be taken from the PGR’s annual leave entitlement
- Where there is no clear relationship between the amount of extra time being requested and the problem being encountered by the PGR
- Where permission has been granted for the PGR to register concurrently for another programme of study and a request is based citing academic or other commitments linked to the other registration.
- Where an extension of study is requested on the basis of poor English language skills.

43 In all cases the length of time requested needs to be specified and reasonable, in the sense that it bears close relation to the events experienced by the PGR. For example, it is unlikely that a 6 months suspension of study will be granted for a minor illness. Requests for suspensions of study will be considered in whole months only. For administrative purposes suspensions will begin on the 1st day of the month and end on the last day of the month.

J International Students in the UK on Tier 4 (General) Student Visas

44 There are additional requirements placed upon the University by the Home Office in relation to international students who are in the UK on a Tier 4 (General) Student Visa under the Points-Based System. Any adjustments made to a research degree candidature must continue to satisfy the conditions set by the Home Office if the University is to continue to sponsor the PGR.

These include:
• the PGR remains registered as a full-time candidate and makes progress with their research, attending all supervision meetings, seminars, research training and other research events;
• if the PGR stops studying the University is required to make a report to the Home Office and their leave may be curtailed. In this event the PGR is required to leave the UK. PGRs whose study is suspended should be referred to International Student Office for advice;
• any short periods of authorised absence must not have an effect on the PGR’s ability to meet deadlines for his/her research studies, including the transfer deadline and the maximum time limit for submission of the thesis.
It is, therefore, **essential** that international PGRs holding Tier 4 (General) student visa are aware of the following in the event of a suspension to their studies:

a. Their visa will be curtailed by the Home Office; and  
b. They are required to leave the UK during this period; and  
c. They will need to request a new CAS and apply for entry clearance before returning to the UK; and  
d. They should seek immigration advice from the International Student Office [http://www.internationalstudentsupport.leeds.ac.uk/immigration](http://www.internationalstudentssupport.leeds.ac.uk/immigration).

In exceptional cases the University may report absence to the Home Office but not recommend that a PGR leave the UK. Examples of this are where there is civil unrest in the PGR’s home country or extreme medical incapacity. The PGR may then be advised to make an immigration application outside the rules. This would usually involve a referral for specialist immigration advice outside the University.

Schools must not wait for the PGR to submit medical evidence before contacting PGRO.

Where appropriate, PGRO will report the absence to the Home Office and inform both the PGR and School concerned that a report to the Home Office has been made. Failure to comply with this requirement could jeopardise the University’s Home Office sponsor licence as well as causing the PGR to fall outside the immigration regulations.

During an extension of study attendance should be monitored in accordance with established University policy. If the PGR fails to attend action should be taken in line with the Attendance Monitoring Policy.

**K  Authorised Absence**

In some cases a period of suspension of study may not be necessary and a period of authorised absence is more appropriate subject to the following requirements:

- if the period of absence will be for a short period (up to four weeks) in addition to any period of annual leave (five weeks) in any one calendar year and
- the time away from studies will have no impact on the PGR’s ability to meet deadlines (eg transfer, maximum time limit for submission of the thesis).

In such cases the supervisor and the PGR must agree that the short period of absence can be absorbed into the candidature with no allowance made for the PGR to meet academic deadlines for submission of work. A record of the agreement should be kept in writing (eg email).

The University is not required to report short periods of authorised absence for international PGRs holding a Tier 4 (General) student visa to the Home Office provided they do not impact on the overall time limit for completion of the programme of study.

**L  Sponsor/Awarding Body**

Please note that it is the responsibility of the PGR to check the implications of a suspension or extension of study with their scholarship awarding body or provider.

PGRs in receipt of Research Council funding are normally only permitted, by the relevant Research Council, to a total of 12 months suspension in the lifetime of the
award. Other limits may be placed on the length of suspension/extension by external funders and PGRs are responsible for checking the implications of suspensions/extension on their funding.

M Research Councils

55 Set out below is further advice on arrangements for candidates holding research council funding.

(a) Research Councils – Doctoral Training and Doctoral Training Centre Grants (AHRC, BBSRC, EPSRC, ESRC, MRC, NERC and STFC)

- All suspensions and extensions are managed internally by the University (see below for additional information regarding AHRC Block Grant Partnership Studentships and ESRC).
- Research Council funded PGRs are not entitled to receive maintenance payments while suspended.
- Total periods of suspension must not normally exceed one calendar year (12 months) during the lifetime of the award.
- School may wish to take advice from the Postgraduate Scholarships Office about the implications for suspensions/extensions of study for individual candidates holding Research Council awards and the payments they are entitled to receive (enquiries to ext 34007 or pg_scholarships@leeds.ac.uk).

(b) AHRC - Block Grant Partnership Studentship Regulations

Suspensions

- All requests to be sent to PGRO (with a copy to the Postgraduate Scholarships Office). Requests should be made at the time the problem arises and certainly no later than the end of July in the year the PGR is due to submit.
- Approval is not required by AHRC, however, AHRC require suspensions to be recorded on Je-S within one month of their commencement.

Extensions

- All requests to be sent to PGRO (with a copy to the Postgraduate Scholarships Office) no later than the end of July in the year the PGR is due to submit.
- AHRC will not grant retrospective extensions and they can only be approved by AHRC once a PGR has entered their overtime period.
- Maximum period of extension 12 months.

(c) ESRC

Suspensions

- Suspension requests do not require prior approval by ESRC and are handled according to standard University procedures. The period of suspension must not exceed one calendar year in any one instance. Total periods of suspension must not exceed one calendar year during the lifetime of the award (standard period of study). Please note, however, that if a PGR is in the overtime period, ESRC will expect a PGR to request
an extension to their submission deadline, for which prior approval from ESRC is required – see below.

**Extensions**

- Overseas University Visits, Internship Schemes, Difficult Language Training are treated by ESRC as extensions but do not require prior approval by ESRC. If successful, the Postgraduate Research Tutor should submit a request for the appropriate extension to PGRO. The request should be made as soon as the Overseas University Visit/Internship scheme has been formally approved.

- Where a PGR experiences problems relating to an accident, illness or exceptional personal circumstances during the course of study, the ESRC will consider a case for extending the submission deadline. Extensions to the submission date cannot be considered in retrospect. Any request for an extension to the submission date due to illness cannot be considered unless evidence of illness has been provided at the time of illness. To apply for a submission date extension, PGRs must apply to the ESRC, via the Postgraduate Scholarships Office, 2-3 months before the submission date deadline. Any request must be supported in writing by their supervisor and be fully supported by medical evidence if based on illness. If successful, the Postgraduate Research Tutor should submit a request for the appropriate extension to PGRO.

**Suspensions and extensions during the thesis examination process**

56 The Graduate Board’s Examinations Group is responsible for considering, and reaching decisions requests for (i) suspensions/extensions to the resubmission deadline for candidates whose thesis has been referred for resubmission and (ii) extensions to the deadline for corrections of editorial and presentational corrections or minor deficiencies for candidates recommended for award.

57 Requests for PGRs during the thesis examination process are considered by the Examinations Group in accordance with the arrangements outlined in the main body of this document for suspensions/extensions during the period of study prior to submission of the thesis. Faculties/Schools should therefore ensure they have consulted the relevant section of this document before submitting a request.

(i) Suspensions/Extensions during the referral period

58 Cases where the sympathetic consideration is likely to be given to an application for a suspension or extension are outlined in the relevant sections of the main body of this document. In addition to these, the Examinations Group may give exceptional consideration to requests made where the PGR is now in full-time employment and is making a request on the basis of “pressures of work”. Full details must be included in the case. Requests should be made using the pro forma provided.

(ii) Extensions to the period for editorial and presentational corrections/minor deficiencies

59 For PGRs who have been recommended for award, it is important that clear deadlines are in place for the corrections to the thesis in order to act as a motivator for completion. Therefore the PGR normally has 4 weeks (for editorial and presentational corrections) or 12 weeks (for minor deficiencies) from the date of the oral examination.
to complete and return the corrections to the internal examiner for checking.

60 Cases where sympathetic consideration is likely to be given to an application for an extension are outlined in the relevant section above.

61 The University does not prescribe whether a PGR is expected to work full-time on their corrections or the number of hours per day. It is acknowledged that at this point in the candidature many PGRs will already have taken up other responsibilities and commitments. It is, therefore, accepted that one PGR could take a few days/weeks to undertake the same amount of work that another PGR may take several months to complete. In keeping with this the Examinations Group may consider an extension to the normal correction period if PGR’s experience difficulties during the correction period and need extra time because of, for example, work/family reasons.

62 A case for an extension to the correction period must be made by the Postgraduate Research Tutor by email to rp_examinations@adm.leeds.ac.uk (there is no need to complete the full suspension/extension form for these requests).

63 For PGRs recommended for the award of the degree and completing either editorial and presentational corrections or minor deficiencies, please bear in mind that, given the correction periods themselves are only 4 and 12 weeks respectively, requests for long extensions are unlikely to be given sympathetic consideration, unless the circumstances are exceptional.

Annex A

Suspensions and Extensions of Study

Using GRAD to support the suspension/extension of study processes

From January 2018 GRAD includes two separate workflows to support the suspension/extension of study process:

- **Workflow One:** For PGRs to request a suspension/extension *(mirrors the paper-based form used by PGR's to request a suspension/extension)*

- **Workflow Two:** For PGRTs to recommend a suspension/extension *(mirrors the paper-based form used by PGRTs to recommend a suspension/extension to PGRO for consideration on behalf of PSAG)*

Use of GRAD for making requests/recommendations is not compulsory but is intended to complement existing processes. The paper-based forms will continue to be available for use.

PGRs, PGRTs and PGR Administrators are advised not to include confidential information in GRAD.

**Workflow One: For PGRs to request a suspension/extension**

*(this workflow involves the PGR (initiating the request) and the PGR Administrator (confirming receipt of the request and then managing consideration of the request outside of GRAD)*

1. **Initiating the request**

PGRs can submit requests for suspensions/extensions of study in GRAD. The PGR can access the relevant workflow via the change request menu:

- (i). Select the change request menu
- (ii). Start a new change request
- (iii). Select Request suspension/extension

2. **Confidential Information**

The PGR is advised that if the grounds for their request are confidential they should discuss their circumstances with the Faculty Graduate School/PGR Administrator before completing the request in GRAD. When requests will include confidential information the PGR should be advised to submit their request outside of GRAD using the paper-based form available on the SES website.
3. **Sharing information with supervisors**

If the request is not confidential then the PGR can make the request in GRAD. During the workflow the PGR will be asked the following questions:

- **Are your supervisor(s) already aware of this request?**
  - Yes
  - No
- **I agree that the information included in this request may be shared with my supervisor(s)?**
  - Yes
  - No

**Note:** If you select no, your supervisor(s) will not be notified of any details, but they will still be able to see that a request has been made.

Please note that the supervisor will not be able to view the information input into GRAD by the PGR but they will still be able to see a request has been made.

The PGR Administrator should respect the PGR’s stated preference when managing the request outside of GRAD and only share information when they have been given permission to do so.

4. **Tier 4 Student Visa Holders**

For PGRs who hold a Tier 4 Student Visa additional questions will appear in GRAD as part of the declaration process at the end of the workflow:

### For suspensions:

- I hereby declare that all information provided on this form and associated documents is honest and accurate.
- I understand that all information supplied may be shared with my Postgraduate Research Administrator, Postgraduate Research Tutor, Postgraduate Research & Operations, the relevant University committee for the purpose of reviewing this request and my supervisor (if permission was given to share this with my Supervisor).
- I understand that for international students in the UK with a Tier 4 (general) student visa who are applying for suspension of study only: The Tier 4 Sponsor Guidance states that if a student deletes (suspends) their studies after they have arrived in the UK and is no longer actively studying, then their permission to stay is no longer valid and they must leave the UK.
- By submitting this request I confirm my understanding that by requesting a suspension of study:
  - My visa will be curtailed by the Home Office, and
  - I am required to leave the UK during this period, and
  - I will need to request a new CAS and apply for entry clearance before returning to the UK and
  - I should seek immigration advice from the International Student Office

### For extensions:

- I hereby declare that all information provided on this form and associated documents is honest and accurate.
- I understand that all information supplied may be shared with my Postgraduate Research Administrator, Postgraduate Research Tutor, Postgraduate Research & Operations, the relevant University committee for the purpose of reviewing this request and my supervisor (if permission was given to share this with my Supervisor).
- I have read and understood the following advice:
  - You should seek immigration advice from the International Student Office on the implications of extending your period of study.
  - http://students.leeds.ac.uk/info/10500/international_students/077/international_student_office

5. **Automated Email Confirmation to the PGR**

Once the PGR submits their request in GRAD they will receive the following automated email:
6. Automated Email and Task for Graduate School

An automated email will also be generated to the generic School email account and the associated task will appear in the named PGR administrator’s task list.

The PGR Administrator will have the option to delegate the task, return it to the submitter (the PGR) or to confirm receipt. You can use this functionality, for example, to obtain more information from the PGR.

To complete the task in GRAD the PGR Administrator must confirm receipt of the request and add any notes they wish to make to the workflow. If comments are included in the “Notes” field below these will appear in an automated email to the PGR:

The workflow is now closed and consideration of the request should be managed outside of GRAD.
Workflow Two: For PGRTs to recommend a suspension/extension to PGRO for consideration by PSAG

(this workflow can be initiated by either the PGR Administrator or PGRT, requires confirmation of the recommendation from the PGRT before the task is sent to PGRO for action. When a recommendation is approved the workflow will generate email confirmation of the suspension/extension to the PGR and interested parties)

1. Initiating the Workflow
The PGRA or PGRT can initiated the workflow via the change request menu in the individual PGR’s Research Project Page.

2. Tier 4 Student Visa Holder
GRAD will recognise those PGRs who hold Tier 4 student visas and additional relevant questions will appear in the workflow:

4. Postgraduate Research Tutor
Once the recommendation is submitted by the PGRA an automated email will be sent to the PGRT with the associated task. When the PGRT is the supervisor the task will be sent to an alternate PGRT (in those Schools where more than one PGRT has been appointed). In those Schools where only one PGRT is appointed the PGRA must add an alternate PGRT to the PGR’s GRAD record to progress the workflow. In the absence of a Deputy PGRT in the School it is suggested that this might be the Head of School.

The PGRT will have the following options:
Once the PGRT approves the recommendation the task will be forwarded to PGRO (Fran Miles) for consideration and approval on behalf of PSAG.

5. **PGRO**

Once approved on behalf of PSAG an automated email will be generated to the PGR (this contains the information in the standard extension/suspension of study letter) sending copies of the email to interested parties (Student Fees, Scholarships, Student Records).

**WHEN CAN I USE GRAD TO RECOMMEND AN EXTENSION OR SUSPENSION OF STUDY TO PGRO?**

**REMINDER:** In all cases the PGRT is responsible for confirming that the length of time recommended is reasonable – in the sense that it bears relation to the circumstances of the PGR

**USE OF GRAD TO REQUEST SUSPENSIONS**

* If confidential please use paper-based form

**USE OF PAPER BASED FORM**

Please use the paper based form if the following applies:

- grounds for request are confidential (not appropriate to store on GRAD record)
- total periods of suspension/extension exceed 24 months (for a full-time PGR) or 36 months
- period of suspension/extension longer than limits stated in tables above
