Programme of study for Doctor of Philosophy – Soft Matter for Formulation and Industrial Innovation (SOFI²) 2019/20

Year One

The candidate will commence research under the direction of their supervision team and expected to meet with their supervisors at least 10 times per year.

Months One to Five
Case studies at the University of Durham

Month Five to Six
Case study at the University of Leeds

Month Six to Seven
Case study at the University of Edinburgh

Month Seven to Eight
Advanced industrial case study at the University of Durham

Month Nine
Fully registered at University of Leeds
Completion of training plan

Month Eleven
SOFI-CDT mini-MBA (2 week summer school - University of Durham)

Month Twelve
First year progress report

Year Two

The candidate will continue research under the direction of their supervision team and expected to meet with their supervisors at least 10 times per year.

Month Seventeen
Submission of the transfer report

Month Twenty Three
SOFI-CDT mini-MBA (2 week summer school - University of Durham)

Month Twenty Four
Second year progress report

Candidates will be required to successfully transfer to full PhD status by no later than Month 24 in order to progress on the programme.

Year Three

The candidate will continue research under the direction of their supervision team and expected to meet with their supervisors at least 10 times per year.

Month Thirty Six
Third year progress report

Year Four

The candidate will continue research under the direction of their supervision team and expected to meet with their supervisors at least 10 times per year.
Learning Outcomes / Transferable Key Skills / Learning Context / Assessment for PhD

1. Learning Outcomes

On completion of the research programme students should have shown evidence of being able:

- to discover, interpret and communicate new knowledge through original research and/or scholarship of publishable quality which satisfies peer review;
- to present and defend original research outcomes which extend the forefront of a discipline or relevant area of professional/clinical practice;
- to demonstrate systematic and extensive knowledge of the subject area and expertise in generic and subject/professional skills;
- to take a proactive and self-reflective role in working and to develop professional relationships with others where appropriate;
- to independently and proactively formulate ideas and hypotheses and to design, develop, implement and execute plans by which to evaluate these;
- to critically and creatively evaluate current issues, research and advanced scholarship in the discipline;
- to demonstrate systematic knowledge of and be able to critically assess, analyse and engage with the ethical and legal context of their research and any ethical and legal implications of their research.

2. Transferable (Key) Skills

Students will have had the opportunity to acquire the following abilities through the research training and research specified for the programme

- the skills necessary for a career as a researcher and/or for employment in a senior and leading capacity in a relevant area of professional/clinical practice or industry;
- evaluating their own achievement and that of others;
- self-direction and effective decision making in complex and unpredictable situations;
- independent learning and the ability to work in a way which ensures continuing professional development;

3. Learning Context

This will include the critical analysis of, and decision making in, complex and unpredictable professional and/or clinical situations. The structure of the programme will provide research and/or professional training, breadth and depth of study and opportunities for drawing upon appropriate resources and techniques.

Opportunities will be provided for students to:

- develop to a high level interests and informed opinions
- develop to a high level their design and management of their learning activities
- develop to a high level their communication of their conclusions;
- make an original contribution to the field

Students will be expected to engage in the exercise of autonomous initiative in their study and work in professional environments.

4. Assessment

Achievement will be assessed by the examination of the candidate’s thesis and performance under oral examination. Assessment will involve the achievement of the candidate in:

- evidencing an ability to conduct original and independent broad and in-depth enquiry within the discipline or within different aspects of the area of professional/clinical practice normally leading to published work;
- drawing on and/or developing a range of research techniques and methodologies appropriate to enquiries into the discipline/area of professional practice;
- demonstrating independent critical ability in the application of breadth and depth of knowledge to complex issues within the discipline or specialist area of professional/clinical practice;
- drawing on a range of perspectives on the area of study;
• evaluating and criticising received opinion;
• making reasoned and well-informed judgements on complex issues within the specialism whilst understanding the limitations on judgements made in the absence of complete data
• the written style and overall presentation of the thesis
